NEBIUS × NVIDIA GLOBAL AI HACKATHON · ISH + CO-FOUNDER · DEADLINE OCT 30, 10 AM PT

Top 5 ideas: Apps & Agents + Personal AI

Only the two tracks that suit us: product and design-led, light on heavy engineering. Five different fields, five different users. All run on NVIDIA Nemotron via Nebius Token Factory.

Ranking (scored /60)

1-10 each on: **Light build** (how little heavy engineering it needs) · Real pain · Easy to explain · Stands out · Design showcase (25% of judging) · **Track fit** (matches what the track brief asks for).

#	IDEA	TRACK	FIELD	LIGHT BUILD	PAIN	EXPLAIN	STAND-OUT	DESIGN	TRACK FIT	TOTAL
1	**Mentioned**	**Apps & Agents**	**Small business**	**9**	**8**	**10**	**9**	**9**	**9**	**54**
2	Misconception Map	Apps & Agents	Education	7	8	10	9	9	8	51
3	Caregiver Log	Personal AI	Health / family	6	9	9	8	8	8	48
4	Life Admin	Personal AI	Everyday life	6	8	9	6	8	8	45
5	Coach's Assistant	Apps & Agents	Sports	8	7	9	7	8	6	45

Recommendation: Mentioned: lightest build, most visual, and it uses the Apps & Agents stack (Nano/Super/Ultra + Serverless + Tavily) exactly as the brief describes. **Runner-up: Misconception Map**, the most emotional story.
Note: Personal AI picks need NVIDIA's newer agent tools (NemoClaw / OpenShell / Hermes Agent), which adds learning time.

1 · Mentioned — 54 / 60

Apps & Agents · Small business

"Your customers stopped Googling. They ask AI. Does it mention you?"

HOW IT WORKS

Enter a business name, city and type. It asks 25 customer-style questions, searches the web like an AI assistant, and shows: **"AI mentions you in 3 of 25 answers. It recommends these 4 instead, and here's why."** Then it writes paste-ready fixes and re-checks weekly.

WHY

- Text in, text out: simplest build
- Timely, with a clear subscription model

WATCH OUT

Shows visibility, not sales. SEO tools may copy it.

2 · Misconception Map — 51 / 60

Apps & Agents · Education

"Grading tells a teacher who got it wrong. This tells them why."

HOW IT WORKS

A teacher uploads a class's quiz answers (Google Forms export or photos). The AI groups wrong answers by the misunderstanding behind them, e.g. **"11 students think 1/3 > 1/2 because 3 > 2"**, and writes a 10-minute reteach plan plus practice questions per group.

WHY

- Most creative, human story
- Weekly use; not a tutor chatbot

WATCH OUT

Handwriting is hard. Start with typed answers.

3 · Caregiver Log

48 / 60

Personal AI | Health / family

"Talk for 30 seconds a day about Mom. Walk into the doctor's office with the whole picture."

HOW IT WORKS

A family caregiver leaves short voice notes ("slept badly, skipped lunch, a bit confused"). A private, always-on assistant remembers everything, spots changes over weeks, and writes a **one-page brief for the next doctor visit**.

WHY

- Deepest real-life pain
- Exactly the Personal AI brief: memory + privacy

WATCH OUT

New NVIDIA agent tools to learn; health data needs care.

4 · Life Admin

45 / 60

Personal AI | Everyday life

"Never miss a return window, renewal or warranty again."

HOW IT WORKS

It reads your receipts and confirmation emails, then keeps one timeline of every deadline: returns closing, subscriptions renewing, passport or licence expiring, warranties you can still claim. It nudges you in time and **drafts the cancel / return / renew message** for you.

WHY

- Everyone has this problem
- Uses memory + skills + tools, as the track asks

WATCH OUT

Needs email access; less novel.

5 · Coach's Assistant

45 / 60

Apps & Agents | Sports

"For the volunteer coach: talk after the game, get the practice plan and the parent update."

HOW IT WORKS

After a youth or amateur game, the coach records a 2-minute voice note and adds the basic stats. The agent tracks each player's progress over the season and writes **next practice's plan, each player's focus area, and the weekly parent email**.

WHY

- Light build, fun demo
- Huge, overlooked audience of volunteer coaches

WATCH OUT

Lower "impact" score with judges than health or education.

Also considered: Shop Brain (owner's know-how → staff training app, 46/60). Left out to avoid a second small-business idea.
